Message:

Here are my comments on the RFI WP and on your comments

1) Under general comments- number 1, I had a hard time understanding this paragraph, the wording is a little strange, clarification of wording would help. Number 3, should we add something like "baseline R.A. isn't required if FtB cleans up to stds"?

2) Under specific comments- SWMU 18, wording in the 2nd sentence "the reg agency at the NMED responsible for approving this WP, the HRMB..." isn't totally accurate since the GWQB does have it's required input here. The wording needs to reflect the actual situation. - SWMU 27, the report mentions 55 gal drums seen in the pit, but no other mention of them exists re: determine what's in them, remove them, etc. - References to the AA is unclear, who is this, etc., and - the final cover letter doesn't get signed by Benito or by any one Bureau Chief, either by you as DSMOA or by Ed Kelly. Pretty brief comments, yours were pretty thorough. Let me know what you think of my comments.
