**RE: FINAL RESULTS OF THE SEMI-ANNUAL WASTEWATER OUTFALL
MONITORING FOR NEW MEXICO SITES – MARCH 2014
SWMU 76 MEYER AND SWMU 27B DOÑA ANA
EPA ID #NM4213720101
HWB-FB-14-004**

Dear Ms. Waggoner:

The New Mexico Environment Department (NMED) has reviewed the Department of the Army's (Permittee's) *Final Results of the Semi-Annual Wastewater Outfall Monitoring for New Mexico Sites – March 2014, SWMU 76 Meyer and SWMU 27B Doña Ana* (Report).

The Permittee has fulfilled its obligation to conduct semi-annual sampling in March 2014 and submit sampling results and wastewater flow monitoring reports to NMED. The monitoring and associated reports are required by the January 2006 Settlement Agreement (2006 SA) between NMED and the United States Army, Fort Bliss Air Defense Artillery Center. NMED accepts the Report and provides the following comment.

Comment:

1. Section 3, First Paragraph, Page 3.

NMED Comment: This paragraph mentions collection of samples from the Hondo Pass and Atlas outfall locations but the remainder of the Report seems specific to the Doña Ana and Meyer outfall locations. Review future Reports to ensure that the Report text matches the work performed.

If you have any questions regarding this letter, please contact Daniel Comeau at (505) 476-6043.

Sincerely,

John E. Kielling
Chief
Hazardous Waste Bureau
