

MEMORANDUM OF MEETING OR CONVERSATION

<input checked="" type="checkbox"/> TELEPHONE	<input type="checkbox"/> PERSONAL	TIME: 2:45	DATE: 5/17/90
ORIGINATING PARTY		OTHER PARTIES	
Sharon Moore, HAFB		David Wagan	
SUBJECT HAFB storage area floor			
<p>DISCUSSION HAFB wants to continue to use their existing building, with its cracked floor, until 1992 or 1993 when they anticipate getting a new building design + funding to replace the facility. Sharon wanted to know how this would impact the permitting, + the 1992 deadline. I said I wasn't sure exactly what happened in 1992 but I thought that they would <u>have</u> to have a permit by then, and the way to go might be to go ahead + get a permit based on the existing building + then modify it for the new building, but that I would have</p>			
<p><del>CONCLUSIONS OR AGREEMENTS</del></p>			
<p>to ask Elizabeth Gordon how all this would work.</p>			
<p>Sharon said they'd get some containment pass made to set the drums in while they continued to use the existing floor.</p>			
DISTRIBUTION		SIGNED

1100 St. Francis Drive  
Santa Fe, New Mexico 87503

1. This is to document a telephone conversation held on 17 May 1990, between Dave Morgan, NMEID, and Sharon Moore, HARB, with regard to the Defense Reutilization and Marketing Office (DRMO) hazardous waste storage facility.

2. The base will continue to utilize the existing facility for the purpose of hazardous waste storage until Headquarters Defense Logistics Agency (DLA) in Battle Creek, Michigan, funds the construction of a new facility. It is anticipated the facility will be funded in FY 1992 - 1993 time frame. The base has recently been informed that DLA has the proposed facility 90% designed. The base will provide the drawings for the proposed facility should the NMEID desire to have them. The base will request from the NMEID the Part B be modified to reflect the new facility when constructed.

3. Until such time a new facility is constructed, drip pans will be installed both inside and outside, in all areas of hazardous waste storage, to ensure compliance with secondary containment requirements.

4. The point of contact for this is Sharon Moore at 470-7031.

HOWARD E. MOFFITT  
Deputy, Base Civil Engineer
