Santa Fe NM 87505-6063

SUBJECT: Request for Extension for submitting waste acceptance certification for concrete cylinder removed from Site RW-42, Holloman AFB, NM.

Dear Mr. Pierard,

Holloman requests an extension for submitting the final waste acceptance certificate for the concrete cylinders related subject site. The cylinders were removed from Holloman AFB in November 2019 and shipped to a testing facility capable of determining the contents (if any) inside the cylinders. Although all testing of the cylinders to date has identified no radiological characteristics, intrusive testing is necessary to determine the appropriate facility for disposal. Currently, the testing facility has not completed their efforts. The cylinders are scheduled for testing later this month or early April. After completed, the cylinders will then be sent by the waste broker to the most appropriate location for disposal. The estimated time frame for completion of this effort is approximately 9 months.

Therefore, we request a 12- month extension for submitting the waste acceptance certification necessary to obtain the final corrective action complete status for the site.

If you have any questions or concerns regarding this submittal, please contact me at (575) 572-6675.

Sincerely,

KUSMAK.ADAM
