HEADQUARTERS 1606TH AIR BASE WING (MAC)  
KIRTLAND AIR FORCE BASE, NEW MEXICO 87117-5000

Dr. A. Elizabeth Gordon  
Permitting Supervisor  
Hazardous and Radioactive Waste Bureau  
New Mexico Health and Environmental Department  
Harold Runnels Building  
1190 Saint Francis Drive  
Santa Fe New Mexico 87503

Dear Dr. Gordon

Your letter of 13 September 1990 requested clarification on the plans of the Conforming Storage Building. The following information is provided:

1. The dimensions of each storage bay are shown on Plan No. A-1.1 "Floor Plan". The elevation of the floor of each bay is shown as 99' 6" on Plan No. A-3.1 and No. A-1.1. The elevation of the hallway and unloading dock is 99' 10" also shown on Plan A-3.1. The perimeter curb of the building is 100' 0".

2. The stacking arrangements for containers is shown on page M-9 of Kirtland Air Force Base's (KAFB) Part B submission of May 1988 (Atch 1).

3. The M-9 drawing is to scale and show the aisle spaces. The aisle is adequate to accommodate the forklift with a four barrel capacity pallet. A discussion and tables of the bay's flooded capacity and barrel storage capacity are shown on page M-10 and H-4/H-6 (Atch 2-4).

A letter from the United States Corps of Engineers certifying that the Conforming Storage Building was built to the plans is submitted in compliance with (Module I, Section E.12) (Atch 5).

If you need further clarification, please contact Mr Harry Davidson at 846-2773.

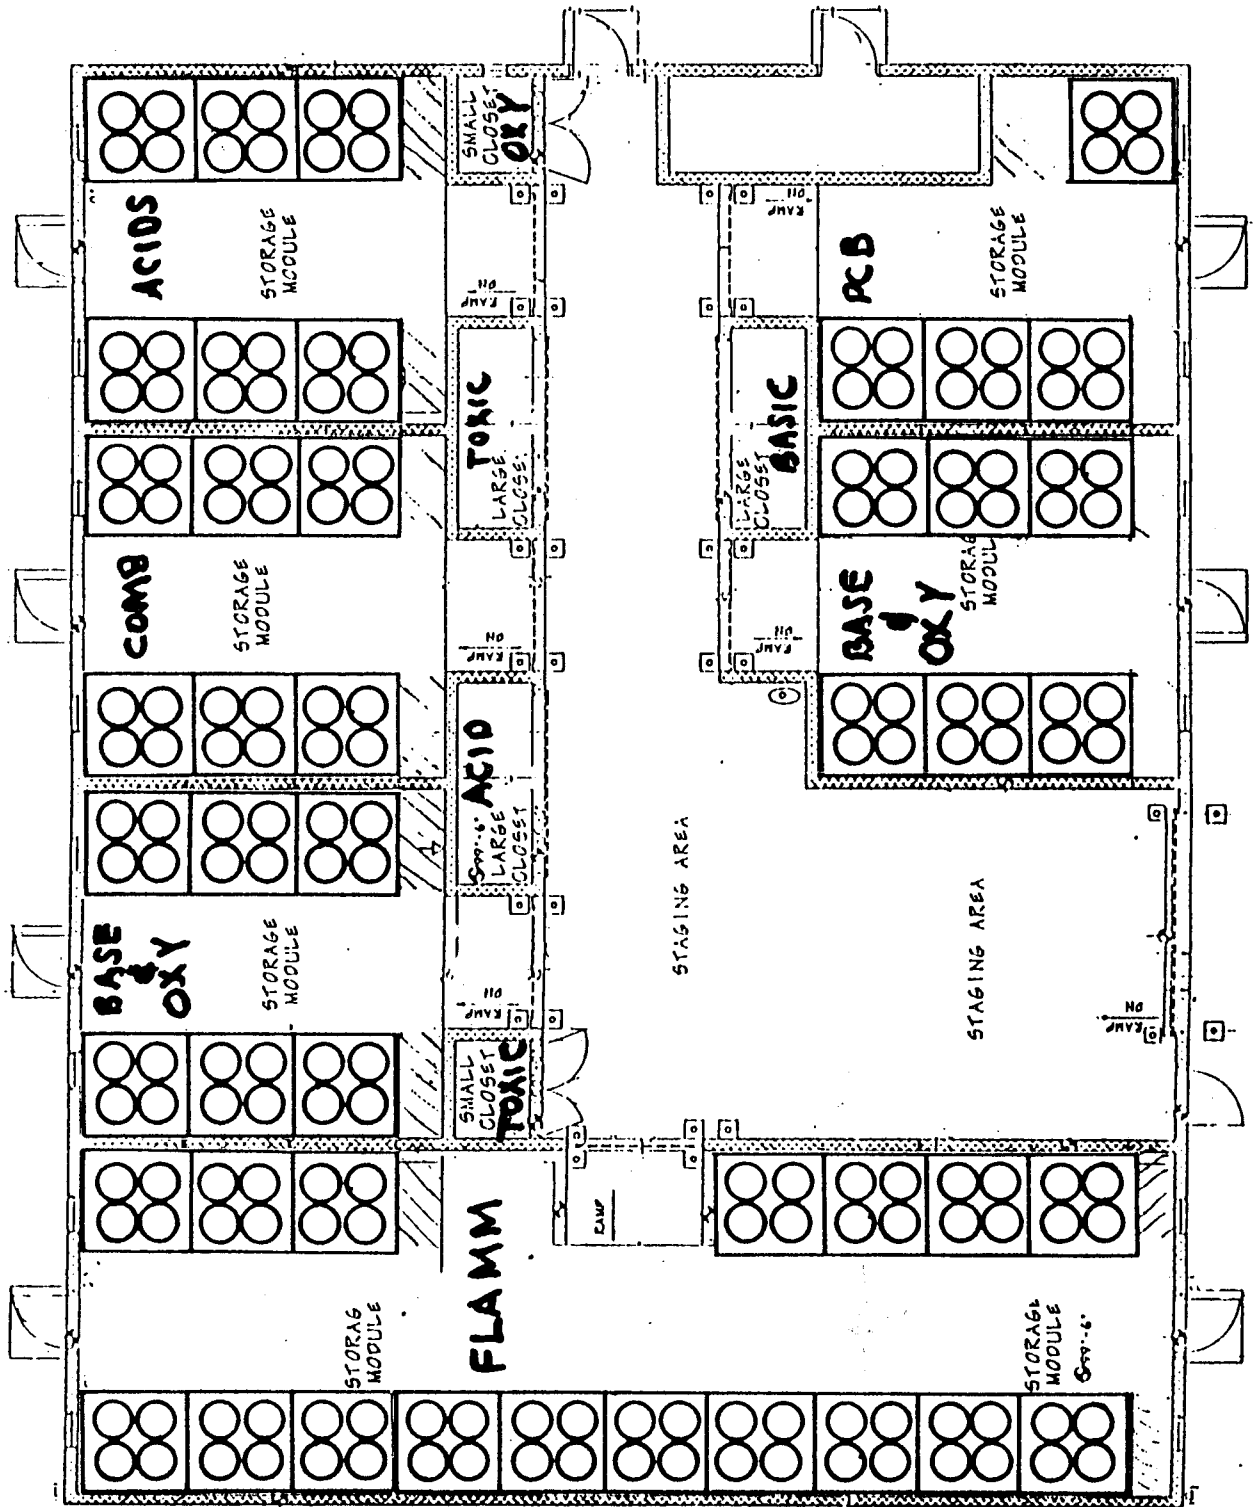

*Edward A. Behling*  
EDWARD A. BEHLING, Colonel, USAF  
Director  
Environmental Management Division
