Ms. Nancy Morlock, Environmental Engineer
RCRA Permits Branch
U.S. EPA Region 6
1445 Ross Ave, Ste 1200
Dallas TX 75202-7233

Dear Ms. Morlock

Brown and Root personnel completed sampling of the contents of the Stage 2D-2 radioactive holding tanks at the Manzano Weapons Storage Area (MWSA) during the period 26 April 1995 through 3 May 1995. We originally planned to obtain a liquid, sediment, and composite sample from each tank; however, after gaining access to the tanks, the following variations to this plan were noted:

- RB-4 contained liquid only and was full. Only the liquid sample was obtained.
- RB-5 contained two inches of liquid and sediment. Only the composite sample was obtained.
- RB-6 contained six inches of liquid and sediment. Both a liquid and sediment sample were obtained.
- RB-8 contained liquid only and was nearly full. Only the liquid sample was obtained.
- RB-9 contained one foot of liquid. Only the liquid sample was obtained.

We plan to plug all drains that direct liquid (house-cleaning, shower, and minor seepage water) to these tanks as part of this RFI.

KAFB1615

Please call me at (505) 846-005, if you have any questions.

Sincerely

CHRISTOPHER B. DeWITT, R.P.G
Chief, Restoration Branch
Environmental Management Division
