P.O. Box 26110
Santa Fe, New Mexico 87505

Dear Ms. Hoditschek

This is a Class I Modification to amend the Kirtland Air Force Base (KAFB) Explosive Ordnance Disposal Facility Subpart X, Open Burning Part B Permit (NM9570024423-OB). Please add the attached Class I Modifications (See attachment 1) to the existing RCRA Part B Permit (NM9570024423-OB). The modifications are based on a meeting held between you, your staff and KAFB personnel on 1 Sept 95. It is of the utmost importance to have these Class I Modifications incorporated into the OB permit since KAFB has an urgent need for this facility.

If you have any questions, please contract me at 846-5037 or Terry Cooper at 846-0007.

Respectfully

WALTER S. DARR III

Chief Compliance
Environmental Management

Names of the EOD Flight Chief and the Range Safety Officers are available at the Kirtland AFB Command Post.

7. Permit Attachment F, Page 20 First Paragraph

No change

8. Module III, Page 5, Paragraph J.3.

The Permittee shall not conduct open burning at any given time when the wind speed is greater than 15 miles per hour. The OB treatment unit shall be ~~enclosed on all four side with a metal top~~ **covered on top with a cover that is water resistant and tied down**. When the OB treatment unit is not in use a cover shall be placed over the top to keep any wind out thus preventing any ash from spreading between burns.

9. Permit Attachment G, Page 1, ~~Page 1~~, "Prevention of precipitation accumulation" section, 3rd sentence:

A precipitation cover ~~to~~ **will** be used during non-operational periods for prevention of possible accumulation of precipitation, ~~consists of 2 metal sheets that will be tied down and secured~~ to prevent water **from** entering. The ~~sheets of metal~~ **Herculite cover** will have edges that come over the side approximately 1/2 inch.

10. Permit Attachment L, Page 1, First Paragraph

The following records will be maintained at ~~OB treatment unit personnel bunker and KAFB Environmental Management Division:~~ ***the Explosive Ordnance Disposal Shop, Building 20413:***

11. NMED Response to KAFB comments, Page 3, Comment #4 (Module II, Page 2, C.2.a

The Permittee may receive hazardous waste for treatment at the OB Treatment Unit from the potential suppliers listed in Table A-2. ***If hazardous waste to be treated at the OB unit comes from a supplier not listed in Table A-2, KAFB will notify NMED within 14 days at which time a determination can be made if a permit modification is warranted.***

12. Attached is the baseline groundwater monitoring information requested by NMED. As indicated by Nancy Morlock, US EPA Region 6 during a site visit to the OB unit on 23 Aug 95, groundwater monitoring is not necessary at the OB unit. Therefore, Module III, Page 6, Section N, Baseline survey of the EOD Range, the paragraph should be modified to say:

The Permittee shall conduct soil ~~and groundwater~~ background sampling or baseline survey of the explosive ordnance disposal range that includes the permitted OD treatment unit, ***and*** the new OB unit. ~~and the SWMU 06-19.~~ ***The background soil sampling requirement can be fulfilled by the background/quarterly soil sampling conducted in accordance with the OD permit.*** This baseline survey must commence at the issuance of this open burn operational permit. ~~The Baseline survey shall include adequate groundwater quality analysis for major ions and RCRA hazardous constituents.~~
