Mr. Steve Asher, Director  
New Mexico Environmental  
Improvement Division  
Post Office Box 968  
Santa Fe, NM 87504-0968

Dear Mr. Asher:

Subject: Person Generating Station

Enclosed are three (3) copies of Public Service Company of New Mexico's (PNM) June 14, 1984 submittal to EPA, Region VI, concerning the operational history of the subject facility.

This information was requested by EPA as a part of their investigation of a spill of oils and solvents from a tank at Person Generating Station. It is my understanding from conversations with Jim Mullins, EPA, Region VI, that several members of your staff are also interested in reviewing this submittal.

Very truly yours,

H.L. Plum  
Regulatory Coordinator

Dallas, TX 75270

Dear Mr. Mullins:

Subject: Person Generating Station

By letter of April 18, 1984, EPA requested that Public Service Company of New Mexico (PNM) provide information and records pertaining to the operational history of Person Generating Station. Each question with PNM's response can be found in the attachments. Appendices are separately bound.

The documents transmitted are as follows:

- Attachment 1 EPA's letter of April 18, 1984 to PNM.
- Attachment 2 PNM's responses to EPA's questions of April 18, 1984.
- Appendix 1 Public Service Company of New Mexico's Handbook of Analytical Procedures Volume 1: Water Tests.
- Appendix 2 PNM's letter of December 16, 1984 to New Mexico Environmental Improvement Division addressing process wastewater flows, septic waste treatment, and recycling of waste oil and solvents.
- Appendix 3 Documentation of vouchers found describing type and volume of potentially hazardous products purchased.
- Appendix 4 Three reports on the results of soil, geology, and groundwater investigations conducted by PNM at Person Generating Station.
- Appendix 5 Results and assessment of interlaboratory soil analyses conducted on material collected at Person Generating Station.
- Appendix 6 Information on water wells at Person Generating Station.

Mr. Jim Mullins

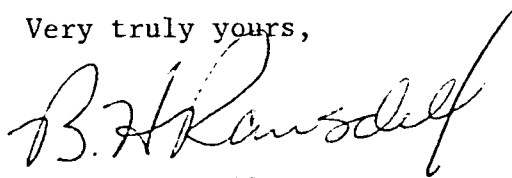

-2-

June 14, 1984

Appendix 7      Copies of drawings and documentation used to compile  
a composite drawing of Person Generating Station and  
facilities.

A substantive part of the information transmitted is from the records of PNM and PNM believes it to be as complete and accurate as possible given the long operating history of Person Generating Station and the time allowed for response. Should you have any questions concerning this submittal, please contact either H. L. Plum at (505) 848-2216, or myself.

Very truly yours,

B. H. Ransdell, Manager  
Gas and Oil Power Plants
