

MEMORANDUM

TO: FILE

FROM:  Teri Davis, RCRA Technical Compliance Program

THROUGH: Ronald A. Kern, Technical Compliance Program Manager 

DATE: October 24, 1995

SUBJECT: PNM Person Generating Station Weekly Status Reports

On October 9, 1995, Ron Johnson of PNM Person Generating Station in Albuquerque requested within the weekly status report received by HRMB fax that the status reports are no longer necessary since the deep plume assessment is believed to be complete. It was verbally agreed by phone message on October 13, 1995 that the weekly status reports are no longer needed. I made this recommendation with the understanding that HRMB will continue to receive the quarterly Treatment Effectiveness Reports, quarterly ground-water monitoring data, and a deep plume Assessment Summary Report will be forthcoming next month.
