Santa Fe, NM 87502

Dear Mr. Bearzi:

Subject: Clarification of Response to Request for Supplemental
Information (RSI), Person Generating Station, NMT360010342

On March 30, 1999, Public Service Company of New Mexico (PNM) submitted its detailed response to the HRMB RSI letter dated November 25, 1998. In subsequent telephone conversations with Mr. Carl Will, the HRMB requested additional clarification on some of the items contained in our detailed response matrix. These clarifications are contained in the enclosed matrix document. This document is identical to the original submittal except that all changes are identified as either deleted (strike through) or new (underlined).

It is our understanding, based on discussions with Mr. Will, that once HRMB has had an opportunity to review these clarifications, and if HRMB is in agreement with our response and has no further request for supplemental information, PNM will then provide modified pages for insertion/incorporation into the previously submitted permit application which will become available for the public comment process.

PNM would appreciate a written response from HRMB indicating that it has met all requirements of the RSI. PNM would also appreciate having 60 days to prepare a package of replacement pages for the RCRA permit application.

If you have any questions, please contact me at (505) 241-2998.

Sincerely,

Ron D. Johnson
Technical Group Leader
