**RE: Person Generating Station (NMT 360010342-1) – Supplemental Information for
Groundwater Monitoring Data Annual Report for 2003**

Dear Ms. Cooper:

Public Service Company of New Mexico (PNM) has received your letter request for supplemental information dated July 7, 2004.

Enclosed are five groundwater contamination plume maps. The three April 1993 plume maps are the earliest plume maps currently available and show the estimated extent of the groundwater plume at that time (the groundwater treatment system became operational in January 1995). Also enclosed are the most current groundwater contamination plume maps (April 2004). No current plume map for 1,1,1-TCA has been prepared since the concentrations of this contaminant have dropped to near or below laboratory detection limits in the monitoring wells.

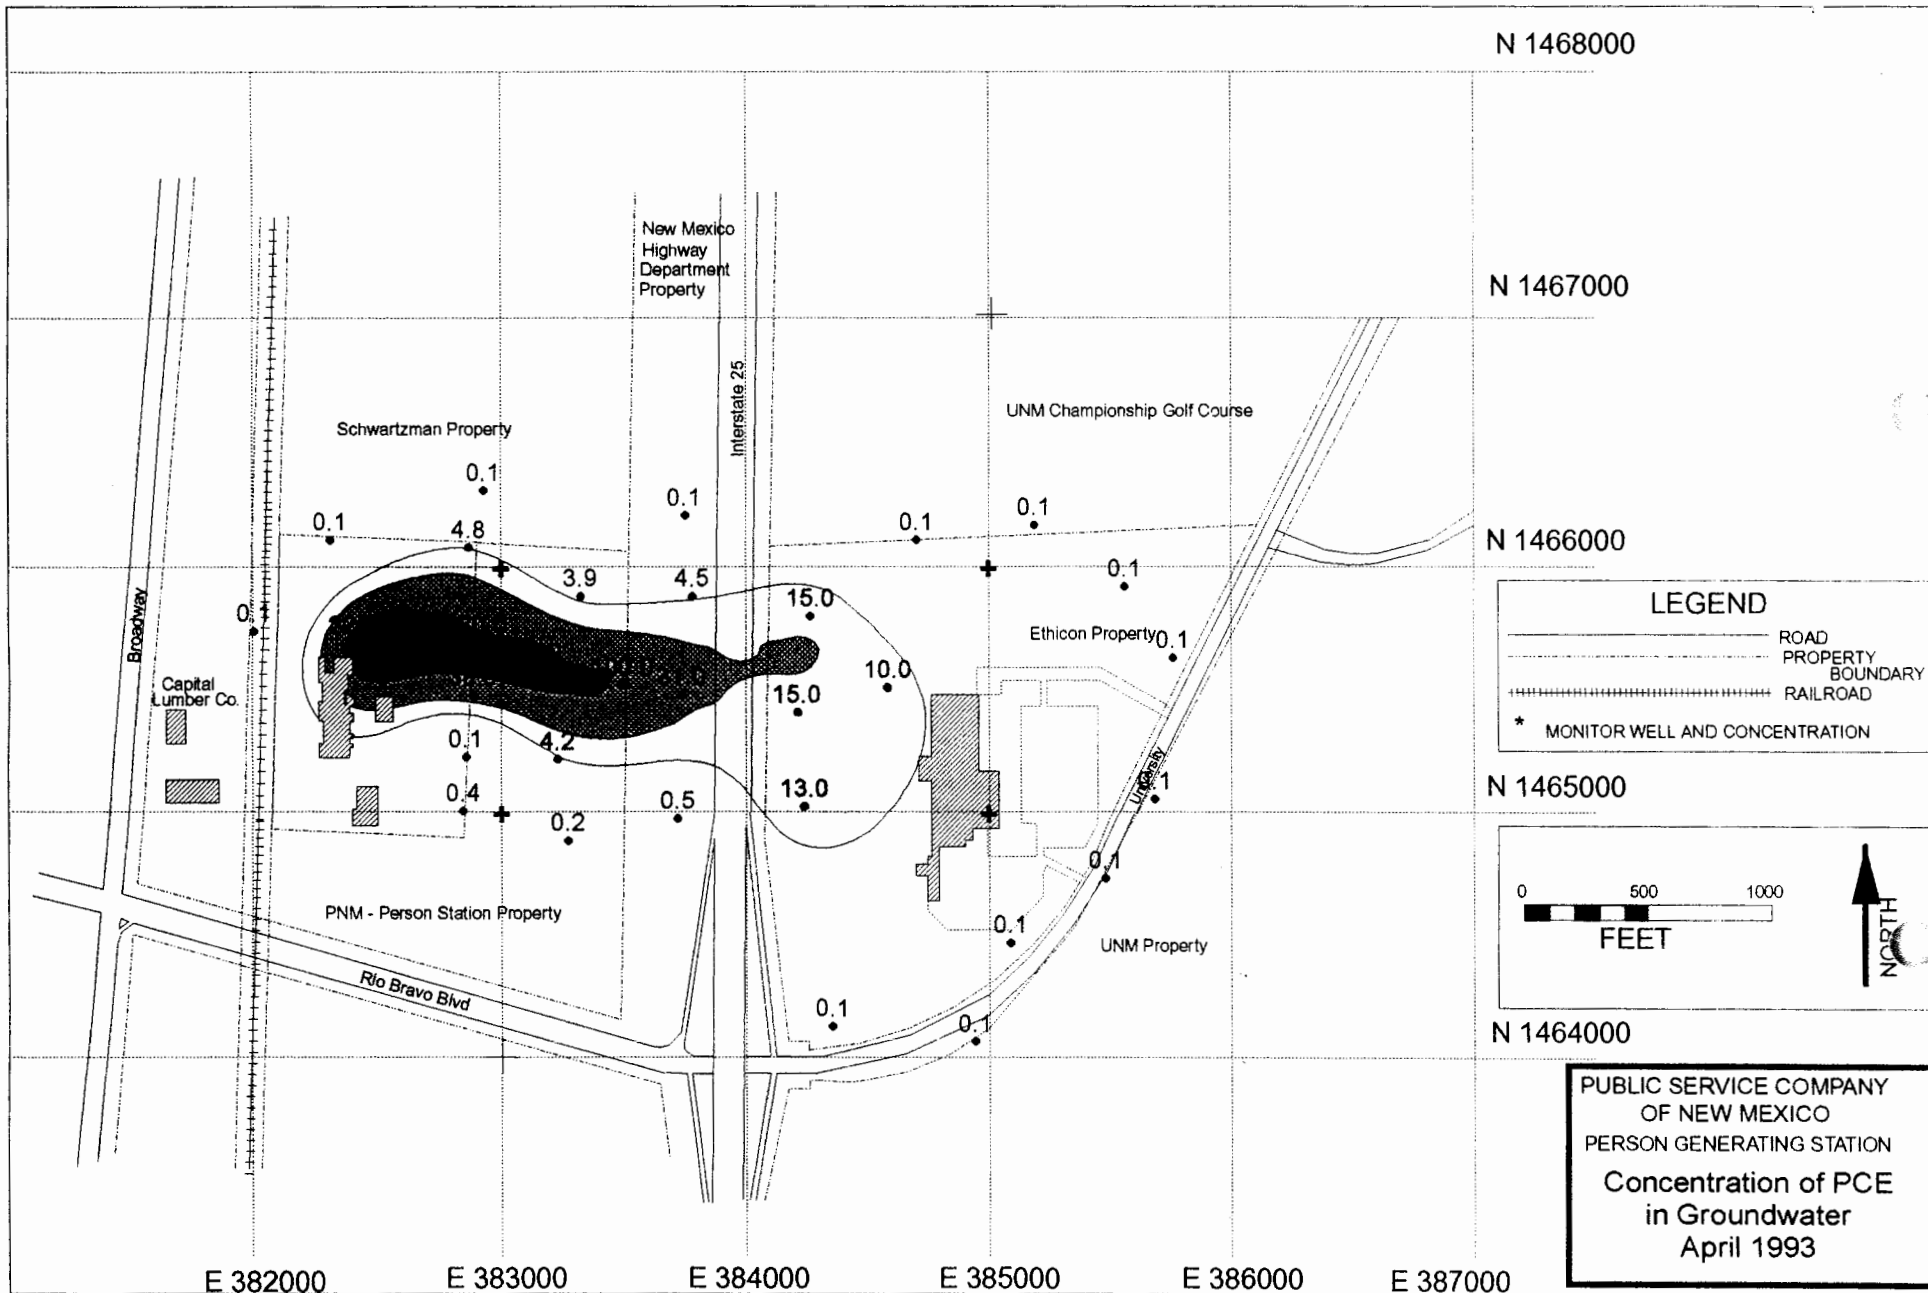

Regarding your request to revise Table 3 to include the 2003 water level measurements, please note that the water level measurements for all monitoring wells can be found on the Well Sampling Data Forms in Appendix D of the 2003 annual data report.

Please note that my mail stop is now MS Z110. If you have any questions, please contact me at (505) 855-6392.

Sincerely,

John Hale, P.E.
Technical Project Manager
