SUBJECT

Safety Kleen (ABQ & Farmington) Permit Modification

SUMMARY OF COMMUNICATION

I contacted Bob Wachsmuth of Safety-Kleen. Permit Modification request was submitted for Albuquerque Service Center on June 29, 1992. Safety-Kleen also requested a modification to the Safety Kleen Farmington Facility, but I have not seen this modification request. Wachsmuth will send a copy of the Farmington Mod Request if we can't find our copy. Wachsmuth said the modifications were submitted to update the Farmington and Albuquerque permits, but that their operations would not be affected if we did not approve the modifications in FY93. Processing the Safety-Kleen mods are not on the EPA Grant Workplan for FY93. I told Wachsmuth that we could put the permit modifications processing in our FY94 Grant in the 1st Quarter. He agreed.

CONCLUSIONS, ACTION TAKEN OR REQUIRED

For FY93 I agreed to send Safety Kleen the State's Permit Fee schedule with a letter describing Minor/Major modifications around February 1993. We can proceed to define the Major/Minor modifications, and obtain an official Permit Modification submittal on the ABQ and Farmington facilities. By the end of FY93 we will have assessed the fees, rec'd payment and have, in house, the official Mod Requests to proceed with the mod. processing in 1st Qtr FY94.
