

Sandia National Laboratories

Mixed Waste Landfill

Long-Term Monitoring and Maintenance Plan

Dear Sirs;

AVAT + Citizen Action has evidence that the monitoring wells of Sandia Labs were wrongly positioned; therefore, all decisions are being made on false tests, and wastes are already entering the aquifer.

Why is the MW landfill allowed to continue so precariously, in an unlined, unsealed dump? When EPA staff agree with our science 'it is time for the REVIEW now! and remediation immediately! It is a situation that cannot get better, as is, and more + more ABQ citizens are learning of the failures through multiple forums of Amigos Bravos, UNM, Endangered Aquifer, Food + Water Watch, Cit. Action + other groups, + organizations.

P.S. Please respond in writing.

Yours truly,
 Carol W Benson
