Re: Notice of Monthly SVE Emission Test and Vacuum Influence Study.

Dear Mr. Mathew:

Sparton Technology intends to conduct a monthly test on our Coors Road Facility Soil Vapor Extraction System on Wednesday, June 10, 1998 at approximately 10:00 am. Gas samples will be taken at two sampling points, SVE influent and effluent. EPA method 8260 will be used for the analysis of these 2 gas samples. Our sampling equipment will be set up so that you can take samples if needed.

Additionally Sparton intends to conduct a vacuum radius of influence study starting at 8:30 am on the same day, June 10, 1998. Water manometers will be installed on selected monitor and vapor probe/recovery wells to measure the vacuum influence of the SVE system. Barometric pressure and temperature will be recorded before, during and after this study to compensate for atmospheric affects on vacuum readings.

If you have any questions please feel free to call John Wakefield at 892-5300.

Sincerely,
SPARTON TECHNOLOGY, INC.

John W. Wakefield for Richard D. Mico
