

9/20/00

Dear Mr. Zapper,

We oppose any expansion of the WIPP site that would include changes in the amount, type (higher level radioactivity, etc.) or less lenient regulations for the site. This is totally inappropriate given the decades long planning and citizen involvement that have gone into making WIPP "ready" for its already previously approved parameters. Do not expand these. It is a disservice to New Mexicans, and increases all of our risk of exposure. We have serious questions about WIPP's safety and ~~readiness~~ readiness for those purposes for which it has been approved,
