Brian -

Attached is a new Waste Stream Profile Form (**WSPF**) for INEEL waste INW296.001 bound for WIPP. I'm providing it for your information. I note that this appears to be the first unquestionably designated mixed waste stream from INEEL, due to the presence of numerous metals and solvents. Call with any questions.

By the way, according to my schedule, INEEL will be undergoing an audit of their homogeneous solids characterization activities during the week of December 4. I hope to see you then and have the opportunity to discuss any outstanding issues you might have.

Steve
