Nick:

Just wondering about the latest with the RCRIS CAPS entries we discussed last week for the WIPP. Since my version of CAPS appears to be corrupted, I believe you said that Nancy Fagan (not sure about the spelling of the last name) was going to enter the data I faxed to you last week and come up with a score and an appropriate ranking. Is there anything you need me to do from here? Do you need any other site-relevant information (SWMU/AOC data)? Let me know; I'll be in all week.

Thanks. Will.
