**RE: SECOND EXTENSION REQUEST APPROVAL FOR RESPONSE TO DISAPPROVAL  
AOC 15 - NEW API SEPARATOR AND AOC 16 - NEW API SEPARATOR OVERFLOW TANKS  
INVESTIGATION WORK PLAN  
WESTERN REFINING SOUTHWEST LLC D/B/A MARATHON GALLUP REFINERY  
EPA ID# NMD000333211  
HWB-WRG-20-003**

Dear Mr. Moore:

The New Mexico Environment Department (NMED) has received Western Refining Southwest LLC (D/B/A Marathon Gallup Refinery's (the Permittee) *Response to Disapproval Extension Request Area of Concern 15 – New API Separator and Area of Concern 16 – New API Separator Overflow Tanks Investigation Work Plan* (Request) dated February 8, 2023.

The Request states, "In preliminary testing of the fluorescent properties of media around the [New American Petroleum Institute Separator] NAPIS, it was determined that there is potential interference from separate phase hydrocarbon (SPH) impacts in soil and groundwater, and soil with impacts could fluoresce without the addition of the dye. Therefore, it can be difficult to discern if observed fluorescence is from pre-existing SPH impacts or a recently introduced dye. To evaluate if soil fluoresces in the area of the NAPIS bays prior to introduction of fluorescing dye, Western will be completing soil borings in 4 locations around the NAPIS and testing for fluorescence. Western requested an initial extension to March 15, 2023 to allow for the soil borings around the NAPIS to be completed and findings incorporated into a revised approach. The soil investigation was scheduled to take place the week of December 19, 2022, however, the drilling was unable to be completed. Because of this, Western is requesting the extension of the Response to Disapproval from March 15, 2023 to April 30, 2023 to allow for the soil borings to be completed and the work plan to be revised."
